Will my computer run USAV Academy?

Steve Webster - 2019-01-21 - in General

The USA Volleyball Academy has a utility to test your computer's configuration for compatibility with the Academy software.

At both the Login screen or by clicking Home, you will see a System Test button. Click that button and then Test my Workstation. We will evaluate your computer or device to see if you are prepared to run the Academy.

If the utility reports errors, please address those issues before trying to access course materials.
